

FOXDEX REPORT

FOR PARTNERSHIP

FOXDEX POWERED BY FOXCHAIN LABS

WHAT IS FOXDEX

Foxdex is the first ecosystem of the FOXCHAIN project developed by Foxlabs. It is a platform that focuses on developing a Decentralized Exchange, Liquidity Provider, Staking, and Yield Farming. With Foxdex, you can connect with the trading of coins on other blockchains, using the Smartrouter technology and supporting Multichain technology.

The world of blockchain and cryptocurrencies has been growing exponentially, and decentralized exchanges (DEX) are becoming more popular among traders. DEX offers a decentralized approach to trading, where users can trade without the need for a central authority to hold their assets. Foxdex takes this to the next level with its unique features.

Another significant feature of Foxdex is its support for Multichain technology. This technology enables Foxdex to support multiple blockchains, giving users more options to choose from. This feature also provides users with more flexibility in terms of choosing which blockchain they want to trade on.

WHAT IS FOXDEX

One of the essential features of Foxdex is its Decentralized Exchange. It provides users with a secure and transparent trading environment. Users can trade directly from their wallets, which gives them full control over their assets. Foxdex also offers low trading fees, making it affordable for everyone.

Liquidity providers are also an essential part of the Foxdex ecosystem. By providing liquidity, users can earn rewards in the form of transaction fees. This feature helps to maintain a stable trading environment on the platform.

Staking and Yield Farming are also available on Foxdex. Users can stake their tokens and earn rewards in return. Yield Farming, on the other hand, involves providing liquidity to the platform and earning rewards in return. Both of these features help users to earn passive income while holding their tokens.

Foxdex Smartrouter technology is a game-changer for the blockchain industry. It allows users to connect with other blockchains and trade coins that are not available on Foxdex. This feature opens up a world of opportunities for traders, as they can access a wider range of cryptocurrencies without having to use different platforms.

PARTNERSHIP

- CLIENT : **SOMA NETWORK**
- DATE OF LAUNCH : **04 MAY 2023**
- PROJECT SECTOR : **BLOCKCHAIN & DEFI ECOSYSTEMS**
- SUBMITTED NAME : **TANAKA (Core Team)**
- AUDIT SMART CONTRACT : [TECHRATES](#)
- CONTRACT ADDRES :
0xb5607c01915c22a841ef72e658cb31cd925968d9
- CHAIN SUPPORTS : **BEP-20**

LOGO SOMA NETWORK

PARTNERSHIP

- DURATION POOL : 30 DAY
- BUYING FOXC : [TXHASH](#)
- SEND TO FOXC WALLET : [TXHASH](#)
- START POOL DATE : June - 21 - 2023
